A5819

Leader in Biomolecular Solutions for Life Science

FADD Rabbit pAb

Catalog No.: A5819 9 Publications

Basic Information

Observed MW 26kDa

Calculated MW 23kDa

Category Polyclonal Antibody

Applications WB, IP, ELISA

Cross-Reactivity Human, Mouse, Rat

Background

The protein encoded by this gene is an adaptor molecule that interacts with various cell surface receptors and mediates cell apoptotic signals. Through its C-terminal death domain, this protein can be recruited by TNFRSF6/Fas-receptor, tumor necrosis factor receptor, TNFRSF25, and TNFSF10/TRAIL-receptor, and thus it participates in the death signaling initiated by these receptors. Interaction of this protein with the receptors unmasks the Nterminal effector domain of this protein, which allows it to recruit caspase-8, and thereby activate the cysteine protease cascade. Knockout studies in mice also suggest the importance of this protein in early T cell development.

Recommended Dilutions

WB	1:500 - 1:2000
IP	0.5µg-4µg antibody for 200µg-400µg extracts of whole cells

Immunogen Information

Gene ID 8772

Swiss Prot 013158

Immunogen

Recombinant fusion protein containing a sequence corresponding to amino acids 1-208 of human FADD (NP 003815.1).

Synonyms

GIG3; IMD90; MORT1; FADD

Source

Isotype lgG

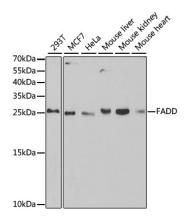

Purification Affinity purification

Storage

Rabbit

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.01% thimerosal, 50% glycerol, pH7.3.

Validation Data

Western blot analysis of various lysates using FADD Rabbit pAb (A5819) at 1:1000 dilution. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (AS014) at 1:10000 dilution. Lysates/proteins: 25µg per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Basic Kit (RM00020).

Immunoprecipitation applysis of 200 µg extracts of HeLa cells using 3 µg FADD antibody (A5819). Western blot was performed from the immunoprecipitate using FADD antibody (A5819) at a dilution of 1:1000.
