

AS030

Leader in Biomolecular Solutions for Life Science

# HRP-conjugated Rabbit anti-Chicken IgY (IgG) (H+L)

Catalog No.: AS030

2 Publications

## Basic Information

### Observed MW

22-30kDa(Light chain),60-70kDa(Heavy chain)/30kDa(Light chain),70kDa(Heavy chain)

### Calculated MW

### Category

Secondary Antibody

### Applications

WB,IHC-P,ELISA

### Cross-Reactivity

### Conjugate

HRP

## Background

Secondary antibodies are affinity-purified antibodies which will work with target-specific primary antibody in the detection, sorting or purification of its specified target. Secondary antibodies offer increased versatility enabling users to use many detection systems (e.g. HRP, AP, fluorescence). They can also provide greater sensitivity through signal amplification as multiple secondary antibodies. Most commonly, secondary antibodies are generated by immunizing the host animal (different from host species of primary antibody) with a pooled population of normal immunoglobulins from the host species of primary antibody and can be further purified and modified (i.e. antibody fragmentation, label conjugation, etc.) to ensure well-characterized specificity to corresponding normal immunoglobulins.

## Recommended Dilutions

ELISA	1:10000 - 1:200000
WB	1:10000 - 1:50000
IHC-P	1:500 - 1:5000

## Immunogen Information

### Gene ID

### Swiss Prot

### Immunogen

Chicken IgY (IgG)

### Synonyms

## Contact

[www.abclonal.com](http://www.abclonal.com)

## Product Information

### Source

Rabbit

### Isotype

Horseradish peroxidase  
conjugated IgG

### Purification

Affinity purification

### Storage

Store at -20°C. Avoid freeze / thaw cycles.  
Buffer: PBS with 0.75% BSA,50% glycerol,pH7.3.

Validation Data

Western blot analysis of lysates from Chicken IgY using HRP Rabbit Anti-Chicken IgY (IgG) (H+L) (AS030) at 1:5000 dilution.  
Lysates/proteins: 50ng - 100ng per lane.  
Blocking buffer: 3% nonfat dry milk in TBST.  
Detection: ECL Basic Kit (RM00020).  
Exposure time: 30s.
