Leader in Biomolecular Solutions for Life Science

Recombinant Human VEGF-B Protein

Catalog No.: RP01118

Recombinant

Sequence Information

Species	Gene ID	Swiss Prot
Human	7423	P49765

Tags

N-Fc

Synonyms

VEGFB; VEGFL; VRF; VEGF-B

Background

This protein is a member of the PDGF (platelet-derived growth factor)/VEGF (vascular endothelial growth factor) family. The VEGF family members regulate the formation of blood vessels and are involved in endothelial cell physiology. This member is a ligand for VEGFR-1 (vascular endothelial growth factor receptor 1) and NRP-1 (neuropilin-1). Studies in mice showed that this gene was co-expressed with nuclear-encoded mitochondrial genes and the encoded protein specifically controlled endothelial uptake of fatty acids. Alternatively spliced transcript variants encoding distinct isoforms have been identified.

Basic Information

Description

Recombinant Human VEGF-B Protein is produced by Mammalian expression system. The target protein is expressed with sequence (Pro22-Ala207) of human VEGFB (Accession #P49765) fused with an Fc tag at the N-terminus.

Bio-Activity

Storage

Store the lyophilized protein at -20°C to -80 °C for long term. After reconstitution, the protein solution is stable at -20 °C for 3 months, at 2-8 °C for up to 1 week. Avoid repeated freeze/thaw cycles.

Product Information

Source	Purification
HEK293 cells	> 95% by SDS-PAGE.

Endotoxin

< 1.0 EU/μg of the protein by LAL method.

Formulation

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4. Contact us for customized product form or formulation.

Reconstitution

Centrifuge the tube before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Validation Data

Recombinant Human VEGF-B Protein was determined by SDS-PAGE with Coomassie Blue, showing two bands at 40&60 kDa.
