## RP01732

Leader in Biomolecular Solutions for Life Science

# **Recombinant Mouse EPO-R/Epor Protein**

Catalog No.: RP01732 Recombinant

Sequence Information			Background		
<b>Species</b> Mouse	<b>Gene ID</b> 13857	<b>Swiss Prot</b> P14753	Erythropoietin (EPO) is the major glycoprotein hormone regulator of mammalian erythropoiesis, and is produced by kidney and liver in an oxygen-dependent manner. The biological effects of EPO are mediated by the specific erythropoietin receptor		
<b>Tags</b> C-6His			(EPOR/EPO Receptor) on bone marrow erythroblasts, which transmits signals important for both proliferation and differentiation along the erythroid lineage. EPOR protein is a type a single-transmembrane cytokine receptor, and belongs to the		
<b>Synonyms</b> EPO-R;Epor			homodimerizing subclass which functions as ligand-induced or ligand-stabilized homodimers. EPOR signaling prevents neuronal death and ischemic injury. Recent studies have shown that EPO and EPOR protein may be involved in carcinogenesis, angiogenesis, and invasion.		

# **Basic Information**

## Description

Recombinant Mouse EPO-R/Epor Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Ala25-Pro249) of mouse EPO-R/Epor (Accession #NP\_034279.3) fused with and a 6×His tag at the C-terminus.

## **Bio-Activity**

## Storage

Store the lyophilized protein at -20°C to -80°C for 12 months.<br/>br/>After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

## **Product Information**

Source	Purification		
HEK293 cells	> 97% by SDS-		
	PAGE.		

## Endotoxin

< 0.1EU/µg

## Formulation

Lyophilized from a 0.22  $\mu m$  filtered solution of PBS, pH 7.4.

## Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid votex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Recombinant Mouse EPO-R/Epor Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 30-35 kDa.
