

A14536

Leader in Biomolecular Solutions for Life Science

HCK Rabbit pAb

Catalog No.: A14536

Basic Information

Observed MW

Refer to Figures

Calculated MW

60kDa

Category

Mouse Monoclonal Antibody

Applications

WB,ELISA

Cross-Reactivity

Human,Mouse,Rat

Background

The protein encoded by this gene is a member of the Src family of tyrosine kinases. This protein is primarily hemopoietic, particularly in cells of the myeloid and B-lymphoid lineages. It may help couple the Fc receptor to the activation of the respiratory burst. In addition, it may play a role in neutrophil migration and in the degranulation of neutrophils. Multiple isoforms with different subcellular distributions are produced due to both alternative splicing and the use of alternative translation initiation codons, including a non-AUG (CUG) codon.

Recommended Dilutions

WB 1:500 - 1:2000

Immunogen Information

Gene ID

3055

Swiss Prot

P08631

Immunogen

Recombinant fusion protein containing a sequence corresponding to amino acids 324-505 of human HCK (NP_001165600.1).

Synonyms

JTK9; AIPCv; p59Hck; p61Hck; HCK

Product Information

Source

Rabbit

Isotype

IgG

Purification

Affinity purification

Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS with 0.01% thimerosal,50% glycerol,pH7.3.
