Leader in Biomolecular Solutions for Life Science

N6-methyladenosine / m6A Rabbit pAb

ABclonal www.abclonal.com

Catalog No.: A17924

12 Publications

Basic Information

Observed MW

Calculated MW

Category

Small Molecule-specific Antibody

Applications

IF/ICC,ELISA, Nucleotide Array, DB, meRIP

Cross-Reactivity

Species independent

Background

Discovered in the 1970s, m6A is the most prevalent internal modification in polyadenylated mRNAs and long non-coding RNAs (IncRNAs) in higher eukaryotes. m6A is widely conserved among eukaryotic species that range from yeast, plants, flies to mammals, as well as among viral RNAs with a nuclear phase. The m6A-based modification is associated with a welldefined RNA motif, RRACH (R: A/G, H: A/C/U). As a representative of the epitranscriptome, m6A mRNA modifications participate in many vital activities in the cell, including stem cell self-renewal and differentiation, mRNA transcription, alternative splicing, nuclear export, translation, degradation, and microRNA processing. These processes determine the expression or inactivation of specific genes, which is vital for growth and development.(PMID: 30416848; PMID: 24662220; PMID: 30429466)

Recommended Dilutions

DB	1:500 - 1:2000
IF/ICC	1:50 - 1:200
meRIP	1:50 - 1:200

Immunogen Information

Gene ID Swiss Prot

Immunogen

Chemical compounds corresponding to N6-methyladenosine / m6A.

Synonyms

N6-methyladenosine; m6A; N6-methyladenosine / m6A

Product Information

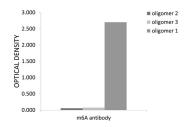

Source Isotype **Purification** Rabbit IgG Affinity purification

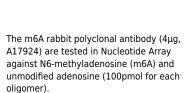

Storage

Store at -20°C. Avoid freeze / thaw cycles.

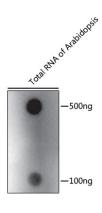

Buffer: PBS with 0.05% proclin300,50% glycerol,pH7.3.

Validation Data

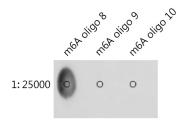

Oligomer 1 - N6-methyladenosine (m6A-CUGGUAACGAAUGGCU-G-Biotin) Oligomer 2 - unmodified adenosine (ACUGGUAACGAAUGGCU-G-Biotin) Oligomer 3 - unmodified adenosine (AAAAAAAAAAAAAAAAAAABiotin)

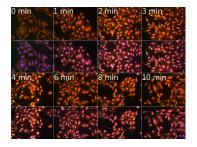

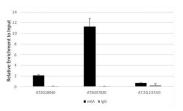

The m6A rabbit polyclonal antibody (500ng/100ng, A17924) are tested in Dot Blot against total RNA of Arabidopsis. (This image is courtesy of an anonymous Abreview)

The m6A rabbit polyclonal antibody (A17924) are tested in Dot Blot against N6-methyladenosine (m6A) and unmodified adenosine.

Oligomer 8 - ATAACTGG-m6A-CCGAATGG Oligomer 9 - ATAACTGGACCGAATGG Oligomer 10 - AAAAAAAAAAAAAAAA-biotin.

U2OS cells pre-treated with BrdU were subjected UVC irradiation incubated at 37 °C for the indicated time, and stained for m6A Polyclonal Antibody (A17924). DAPI, 4',6-diamidino-2-phenylindole. Global UVC irradiation exceed cytoplasmic leavel,peaking at 2 min after irradiation and diminishing over the following 8 min.

Immunoprecipitation analysis of 25 μ g total RNA extracts of Arabidopsis (25 μ g total RNA extracts of Arabidopsis was diluted to 200 μ l IP buffer system) using 2ul m6A antibody (A17924).
