Background

This gene encodes one of six different actin proteins. Actins are highly conserved proteins that are involved in cell motility, structure, and integrity. This actin is a major constituent of the contractile apparatus and one of the two nonmuscle cytoskeletal actins.

Note: Dilution method

Put 5ul AC026 into 45 ul buffer(with 50% glycerol), diluted 1:10,000 for using. The diluted antibody can be stored at -20°C without aliquot.
