

AP0216

Leader in Biomolecular Solutions for Life Science

# Phospho- $\beta$ -Catenin-S33 Rabbit pAb

Catalog No.: AP0216

## Basic Information

### Observed MW

95kDa

### Calculated MW

85kDa

### Category

Polyclonal Antibody

### Applications

WB

### Cross-Reactivity

Human

## Background

The protein encoded by this gene is part of a complex of proteins that constitute adherens junctions (AJs). AJs are necessary for the creation and maintenance of epithelial cell layers by regulating cell growth and adhesion between cells. The encoded protein also anchors the actin cytoskeleton and may be responsible for transmitting the contact inhibition signal that causes cells to stop dividing once the epithelial sheet is complete. Finally, this protein binds to the product of the APC gene, which is mutated in adenomatous polyposis of the colon. Mutations in this gene are a cause of colorectal cancer (CRC), pilomatixoma (PTR), medulloblastoma (MDB), and ovarian cancer. Alternative splicing results in multiple transcript variants.

## Recommended Dilutions

WB 1:500 - 1:1000

## Immunogen Information

### Gene ID

1499

### Swiss Prot

P35222

### Immunogen

A phospho specific peptide corresponding to residues surrounding S33 of human beta Catenin

### Synonyms

EVR7; CTNNB; MRD19; NEDSDV; armadillo; Phospho- $\beta$ -Catenin-S33

## Contact

[www.abclonal.com](http://www.abclonal.com)

## Product Information

### Source

Rabbit

### Isotype

IgG

### Purification

Affinity purification

### Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH 7.3.

Validation Data

Western blot analysis of extracts from MCF-7 cells, using Phospho-β-Catenin-S33 antibody (AP0216).  
Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (AS014) at 1:10000 dilution.  
Lysates/proteins: 25μg per lane.  
Blocking buffer: 3% BSA.
