Leader in Biomolecular Solutions for Life Science

Phospho-Histone H2AX-S2 Rabbit pAb

ABclonal

www.abclonal.com

Catalog No.: AP0617

Basic Information

Observed MW

Refer to figures

Calculated MW

15kDa

Category

Polyclonal Antibody

Applications

WB, ELISA

Cross-Reactivity

Human, Mouse, Rat, Other (Wide Range Predicted)

Background

Histones are basic nuclear proteins that are responsible for the nucleosome structure of the chromosomal fiber in eukaryotes. Two molecules of each of the four core histones (H2A, H2B, H3, and H4) form an octamer, around which approximately 146 bp of DNA is wrapped in repeating units, called nucleosomes. The linker histone, H1, interacts with linker DNA between nucleosomes and functions in the compaction of chromatin into higher order structures. This gene encodes a replication-independent histone that is a member of the histone H2A family, and generates two transcripts through the use of the conserved stemloop termination motif, and the polyA addition motif.

Recommended Dilutions

WB

1:500 - 1:1000

Immunogen Information

Gene ID 3014

Swiss Prot P16104

Immunogen

A synthetic phosphorylated peptide around S2 of human Histone H2AX (NP_002096.1).

H2A.X; H2A/X; H2AFX; Phospho-Histone H2AX-S2

Product Information

Source Rabbit

Isotype IgG

Purification Affinity purification

Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.
