

A10030

Leader in Biomolecular Solutions for Life Science

ADAM22 Rabbit pAb

Catalog No.: A10030

Basic Information

Observed MW

100kDa

Calculated MW

100kDa

Category

Polyclonal Antibody

Applications

WB, ELISA

Cross-Reactivity

Human, Mouse, Rat

Background

This gene encodes a member of the ADAM (a disintegrin and metalloprotease domain) family. Members of this family are membrane-anchored proteins structurally related to snake venom disintegrins, and have been implicated in a variety of biological processes involving cell-cell and cell-matrix interactions, including fertilization, muscle development, and neurogenesis. Unlike other members of the ADAM protein family, the protein encoded by this gene lacks metalloprotease activity since it has no zinc-binding motif. This gene is highly expressed in the brain and may function as an integrin ligand in the brain. In mice, it has been shown to be essential for correct myelination in the peripheral nervous system. Alternative splicing results in several transcript variants.

Recommended Dilutions

WB 1:1000 - 1:4000

Immunogen Information

Gene ID

53616

Swiss Prot

Q9P0K1

Immunogen

Recombinant fusion protein containing a sequence corresponding to amino acids 223-400 of human ADAM22 (NP_004185.1).

Synonyms

MDC2; DEE61; EIEE61; ADAM 22; ADAM22

Product Information

Source

Rabbit

Isotype

IgG

Purification

Affinity purification

Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH 7.3.

Validation Data

Western blot analysis of extracts of various cell lines, using ADAM22 antibody (A10030) at 1:1000 dilution.
Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (A5014) at 1:10000 dilution.
Lysates/proteins: 25µg per lane.
Blocking buffer: 3% nonfat dry milk in TBST.
Detection: ECL Basic Kit (RM00020).
Exposure time: 1s.
