

A12467

Leader in Biomolecular Solutions for Life Science

NPHS1 Rabbit pAb

Catalog No.: A12467

Basic Information

Observed MW

Refer to figures

Calculated MW

135kDa

Category

Polyclonal Antibody

Applications

WB, ELISA

Cross-Reactivity

Mouse, Rat

Background

This gene encodes a member of the immunoglobulin family of cell adhesion molecules that functions in the glomerular filtration barrier in the kidney. The gene is primarily expressed in renal tissues, and the protein is a type-1 transmembrane protein found at the slit diaphragm of glomerular podocytes. The slit diaphragm is thought to function as an ultrafilter to exclude albumin and other plasma macromolecules in the formation of urine. Mutations in this gene result in Finnish-type congenital nephrosis 1, characterized by severe proteinuria and loss of the slit diaphragm and foot processes.

Recommended Dilutions

WB 1:500 - 1:2000

Immunogen Information

Gene ID

4868

Swiss Prot

O60500

Immunogen

A synthetic peptide corresponding to a sequence within amino acids 1142-1241 of human NPHS1 (NP_004637.1).

Synonyms

CNF; NPHN; nephrin; NPHS1

www.abclonal.com

Product Information

Source

Rabbit

Isotype

IgG

Purification

Affinity purification

Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS with 0.01% thimerosal, 50% glycerol, pH7.3.
