## Applications
- WB

## Observed MW
- Human, Mouse

## Calculated MW
- 120kDa

## Immunogen Information
- **Immunogen**: A synthetic peptide corresponding to a sequence within amino acids 1-100 of human ABCG1 (NP_004906.3).
- **Gene ID**: 9619
- **Swiss prot**: P45844
- **Synonyms**: ABC8, WHITE1, ABCG1

## Product Information
- **Source**: Rabbit
- **Isotype**: IgG
- **Purification method**: Affinity purification
- **Storage**: Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH 7.3.

## Background
The protein encoded by this gene is a member of the superfamily of ATP-binding cassette (ABC) transporters. ABC proteins transport various molecules across extra- and intra-cellular membranes. ABC genes are divided into seven distinct subfamilies (ABC1, MDR/TAP, MRP, ALD, OABP, GCN20, White). This protein is a member of the White subfamily. It is involved in macrophage cholesterol and phospholipids transport, and may regulate cellular lipid homeostasis in other cell types. Six alternative splice variants have been identified.

## Recommended Dilutions

| WB    | 1:500 - 1:2000 |
