Leader in Biomolecular Solutions for Life Science

## HYAL3 Rabbit pAb

Catalog No.: A14075

### Basic Information

#### Observed MW

**Calculated MW**  
47kDa

**Category**  
Polyclonal Antibody

**Applications**  
ELISA

**Cross-Reactivity**  
Human

### Background

This gene encodes a member of the hyaluronidase family. Hyaluronidases are endoglycosidase enzymes that degrade hyaluronan, one of the major glycosaminoglycans of the extracellular matrix. The regulated turnover of hyaluronan plays a critical role in many biological processes including cell proliferation, migration and differentiation. The encoded protein may also play an important role in sperm function. This gene is one of several related genes in a region of chromosome 3p21.3 associated with tumor suppression, and the expression of specific transcript variants may be indicative of tumor status. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene, and some isoforms may lack hyaluronidase activity. This gene overlaps and is on the same strand as N-acetyltransferase 6 (GCN5-related), and some transcripts of each gene share a portion of the first exon.

### Recommended Dilutions

### Immunogen Information

Gene ID	Swiss Prot
8372	O43820

#### Immunogen

Recombinant fusion protein containing a sequence corresponding to amino acids 198-417 of human HYAL3 (NP\_003540.2).

#### Synonyms

LUCA3; HYAL-3; LUCA-3; HYAL3

### Contact

[www.abclonal.com](http://www.abclonal.com)

### Product Information

Source	Isotype	Purification
Rabbit	IgG	Affinity purification

#### Storage

Store at -20°C. Avoid freeze / thaw cycles.  
Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.
