Leader in Biomolecular Solutions for Life Science

# **HSPG2** Rabbit pAb

Catalog No.: A20206 1 Publications

# **Basic Information**

### **Observed MW**

Refer to figures

### **Calculated MW**

469kDa

#### Category

Polyclonal Antibody

# **Applications**

WB, ELISA

### **Cross-Reactivity**

Human

# **Background**

This gene encodes the perlecan protein, which consists of a core protein to which three long chains of glycosaminoglycans (heparan sulfate or chondroitin sulfate) are attached. The perlecan protein is a large multidomain proteoglycan that binds to and cross-links many extracellular matrix components and cell-surface molecules. It has been shown that this protein interacts with laminin, prolargin, collagen type IV, FGFBP1, FBLN2, FGF7 and transthyretin, etc., and it plays essential roles in multiple biological activities. Perlecan is a key component of the vascular extracellular matrix, where it helps to maintain the endothelial barrier function. It is a potent inhibitor of smooth muscle cell proliferation and is thus thought to help maintain vascular homeostasis. It can also promote growth factor (e.g., FGF2) activity and thus stimulate endothelial growth and re-generation. It is a major component of basement membranes, where it is involved in the stabilization of other molecules as well as being involved with glomerular permeability to macromolecules and cell adhesion. Mutations in this gene cause Schwartz-Jampel syndrome type 1, Silverman-Handmaker type of dyssegmental dysplasia, and tardive dyskinesia. Alternative splicing of this gene results in multiple transcript variants.

# **Recommended Dilutions**

WB

1:1000 - 1:2000

# **Immunogen Information**

Gene ID

**Swiss Prot** 

P98160

#### **Immunogen**

Recombinant fusion protein containing a sequence corresponding to amino acids 22-195 of human HSPG2 (NP 005520.4).

## **Synonyms**

PLC; SJA; SJS; HSPG; SJS1; PRCAN; HSPG2

# **Product Information**

**Source** Rabbit **Isotype** IgG Purification

Affinity purification

### Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS with 0.01% thimerosal,50% glycerol,pH7.3.
