

A20590

Leader in Biomolecular Solutions for Life Science

Ubiquityl-Histone H2A-Lys119 Rabbit pAb

Catalog No.: A20590

Basic Information

Observed MW

Refer to figures

Calculated MW

14kDa

Category

Mouse Monoclonal Antibody

Applications

WB, ELISA

Cross-Reactivity

Human, Mouse, Rat, Other (Wide Range Predicted)

Background

Histones are basic nuclear proteins that are responsible for the nucleosome structure of the chromosomal fiber in eukaryotes. Nucleosomes consist of approximately 146 bp of DNA wrapped around a histone octamer composed of pairs of each of the four core histones (H2A, H2B, H3, and H4). The chromatin fiber is further compacted through the interaction of a linker histone, H1, with the DNA between the nucleosomes to form higher order chromatin structures. This gene is intronless and encodes a replication-dependent histone that is a member of the histone H2A family. Transcripts from this gene contain a palindromic termination element.

Recommended Dilutions

WB 1:500 - 1:2000

Immunogen Information

Gene ID

3012/8329

Swiss Prot

P04908/P0C0S8

Immunogen

A synthetic ubiquitinated peptide around K119 of human Histone H2A (NP_734466.1).

Synonyms

H2AA; TH2A; H2AFR; HISTH2AA; HIST1H2AA; bA317E16.2; Ubiquityl-Histone H2A-Lys119

Product Information

Source

Rabbit

Isotype

IgG

Purification

Affinity purification

Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS with 0.05% proclin300, 50% glycerol, pH7.3.
