

MMP9 Rabbit pAb

Catalog No.: A2095 **23 Publications**

Basic Information

Observed MW

100kDa/84kDa

Calculated MW

78kDa

Category

Primary antibody

Applications

ELISA, WB

Cross-Reactivity

Human, Mouse

Background

Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix in normal physiological processes, such as embryonic development, reproduction, and tissue remodeling, as well as in disease processes, such as arthritis and metastasis. Most MMP's are secreted as inactive proproteins which are activated when cleaved by extracellular proteinases. The enzyme encoded by this gene degrades type IV and V collagens. Studies in rhesus monkeys suggest that the enzyme is involved in IL-8-induced mobilization of hematopoietic progenitor cells from bone marrow, and murine studies suggest a role in tumor-associated tissue remodeling.

Recommended Dilutions

WB 1:500 - 1:1000

Immunogen Information

Gene ID

4318

Swiss Prot

P14780

Immunogen

A synthetic peptide corresponding to a sequence within amino acids 538-707 of human MMP9 (NP_004985.2).

Synonyms

GELB; CLG4B; MMP-9; MANDP2; MMP9

Product Information

Source

Rabbit

Isotype

IgG

Purification

Affinity purification

Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS with 0.05% proclin300, 50% glycerol, pH7.3.

Validation Data

Western blot analysis of lysates from Mouse spleen using MMP9 Rabbit pAb(A2095) at 1:1000 dilution.

Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L)(A5014) at 1:10000 dilution.

Lysates/proteins: 25 µg per lane.

Blocking buffer: 3% nonfat dry milk in TBST.

Detection: ECL Basic Kit (RM00020).

Exposure time: 30s.
