Leader in Biomolecular Solutions for Life Science

GATA4 Mouse mAb

Catalog No.: A3600 2 Publications

Basic Information

Observed MW

45kDa

Calculated MW

45kDa

Category

SMab Recombinant Monoclonal Antibody

Applications

WB,IHC-P,IP,ELISA

Cross-Reactivity

Human, Mouse, Rat

Background

This gene encodes a member of the GATA family of zinc-finger transcription factors. Members of this family recognize the GATA motif which is present in the promoters of many genes. This protein is thought to regulate genes involved in embryogenesis and in myocardial differentiation and function, and is necessary for normal testicular development. Mutations in this gene have been associated with cardiac septal defects. Additionally, alterations in gene expression have been associated with several cancer types. Alternative splicing results in multiple transcript variants.

Recommended Dilutions

WB	1:200 - 1:500
IHC-P	1:50 - 1:200
IP	1:50 - 1:100

Immunogen Information

Gene ID Swiss Prot 2626 P43694

Immunogen

A synthetic peptide of human GATA4

Synonyms

TOF; ASD2; VSD1; TACHD; GATA4
