A5310

Leader in Biomolecular Solutions for Life Science

DAZ1 Rabbit pAb

Catalog No.: A5310

Basic Information

Observed MW 83kDa

Calculated MW 83kDa

Category Polyclonal Antibody

Applications WB,ELISA

Cross-Reactivity Human

Background

This gene is a member of the DAZ gene family and is a candidate for the human Ychromosomal azoospermia factor (AZF). Its expression is restricted to premeiotic germ cells, particularly in spermatogonia. It encodes an RNA-binding protein that is important for spermatogenesis. Four copies of this gene are found on chromosome Y within palindromic duplications; one pair of genes is part of the P2 palindrome and the second pair is part of the P1 palindrome. Each gene contains a 2.4 kb repeat including a 72-bp exon, called the DAZ repeat; the number of DAZ repeats is variable and there are several variations in the sequence of the DAZ repeat. Each copy of the gene also contains a 10.8 kb region that may be amplified; this region includes five exons that encode an RNA recognition motif (RRM) domain. This gene contains three copies of the 10.8 kb repeat. However, no transcripts containing three copies of the RRM domain have been described; thus the RefSeq for this gene contains only two RRM domains.

Recommended Dilutions

Immunogen Information

WB

1:500 - 1:2000

Gene ID 1617

Swiss Prot Q9NQZ3

Immunogen

Recombinant fusion protein containing a sequence corresponding to amino acids 340-530 of human DAZ1 (NP 004072.3).

Synonyms DAZ; SPGY; DAZ1

Product Information

Source Rabbit **Isotype** IgG Purification Affinity purification

Storage

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.

Validation Data

Western blot analysis of various lysates using DAZ1 Rabbit pAb (A5310) at 1:1000 dilution. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (AS014) at 1:10000 dilution. Lysates/proteins: 25µg per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Basic Kit (RM00020). Exposure time: 90s.
