

A6408

Leader in Biomolecular Solutions for Life Science

XCL1 Rabbit pAb

Catalog No.: A6408

Basic Information

Observed MW

Calculated MW
13kDa

Category
Polyclonal Antibody

Applications
ELISA

Cross-Reactivity
Human

Background

This antimicrobial gene encodes a member of the chemokine superfamily. Chemokines function in inflammatory and immunological responses, inducing leukocyte migration and activation. The encoded protein is a member of the C-chemokine subfamily, retaining only two of four cysteines conserved in other chemokines, and is thought to be specifically chemotactic for T cells. This gene and a closely related family member are located on the long arm of chromosome 1.

Recommended Dilutions

Immunogen Information

Gene ID	Swiss Prot
6375	P47992

Immunogen

Recombinant fusion protein containing a sequence corresponding to amino acids 22-114 of human XCL1 (NP_002986.1).

Synonyms

LTN; ATAC; LPTN; SCM1; SCM-1; SCM1A; SCYC1; SCM-1a; XCL1

Product Information

Source	Isotype	Purification
Rabbit	IgG	Affinity purification

Storage

Store at -20°C. Avoid freeze / thaw cycles.
Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH 7.3.
