

alpha Tubulin Monoclonal Antibody

Catalog No.	AC012	Category	Loading control Antibodies
Applications	WB, IHC, IF, IP	Observed MW	55kDa
Cross-reactivity	Human, Mouse, Rat	Calculated MW	48kDa/49kDa

Immunogen Information

Immunogen	Recombinant protein of human TUBA1B
Gene ID	7277
Swiss prot	P68366
Synonyms	TUBA4A; ALS22; H2-ALPHA; TUBA1; tubulin alpha 4a

Product information

Source	Mouse
Isotype	IgG
Purification method	Affinity purification
Storage	Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Background

Microtubules of the eukaryotic cytoskeleton perform essential and diverse functions and are composed of a heterodimer of alpha and beta tubulin. The genes encoding these microtubule constituents are part of the tubulin superfamily, which is composed of six distinct families. Genes from the alpha, beta and gamma tubulin families are found in all eukaryotes. The alpha and beta tubulins represent the major components of microtubules, while gamma tubulin plays a critical role in the nucleation of microtubule assembly. There are multiple alpha and beta tubulin genes and they are highly conserved among and between species. This gene encodes an alpha tubulin that is a highly conserved homolog of a rat testis-specific alpha tubulin. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.

Recommended Dilutions
