AP0268

Leader in Biomolecular Solutions for Life Science

Phospho-Smad1-S465 Rabbit pAb

Catalog No.: AP0268

Basic Information

Observed MW 55kDa

Calculated MW 52kDa

Category Polyclonal Antibody

Applications WB

Cross-Reactivity Human, Mouse, Rat

Background

The protein encoded by this gene belongs to the SMAD, a family of proteins similar to the gene products of the Drosophila gene 'mothers against decapentaplegic' (Mad) and the C. elegans gene Sma. SMAD proteins are signal transducers and transcriptional modulators that mediate multiple signaling pathways. This protein mediates the signals of the bone morphogenetic proteins (BMPs), which are involved in a range of biological activities including cell growth, apoptosis, morphogenesis, development and immune responses. In response to BMP ligands, this protein can be phosphorylated and activated by the BMP receptor kinase. The phosphorylated form of this protein forms a complex with SMAD4, which is important for its function in the transcription regulation. This protein is a target for SMAD-specific E3 ubiquitin ligases, such as SMURF1 and SMURF2, and undergoes ubiquitination and proteasome-mediated degradation. Alternatively spliced transcript variants encoding the same protein have been observed.

Recommended Dilutions

Immunogen Information

WB

1:500 - 1:2000

Gene ID 4086

Swiss Prot 015797

Immunogen

A phospho specific peptide corresponding to residues surrounding S465 of human Smad1

Synonyms

BSP1; JV41; BSP-1; JV4-1; MADH1; MADR1; Phospho-Smad1-S465

Isotype lgG

Purification Affinity purification

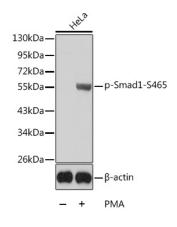

Storage

Source

Rabbit

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Validation Data

Western blot analysis of extracts from HeLa cells using Phospho-Smad1-S465 antibody (AP0268). Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (AS014) at 1:10000 dilution. Lysates/proteins: 25μ g per lane. Blocking buffer: 3% BSA.
