

AP1232

Leader in Biomolecular Solutions for Life Science

Phospho- β -Catenin-Y333 Rabbit pAb

Catalog No.: AP1232

Basic Information

Observed MW

Refer to figures

Calculated MW

85kDa

Category

Polyclonal Antibody

Applications

WB, ELISA

Cross-Reactivity

Human

Background

The protein encoded by this gene is part of a complex of proteins that constitute adherens junctions (AJs). AJs are necessary for the creation and maintenance of epithelial cell layers by regulating cell growth and adhesion between cells. The encoded protein also anchors the actin cytoskeleton and may be responsible for transmitting the contact inhibition signal that causes cells to stop dividing once the epithelial sheet is complete. Finally, this protein binds to the product of the APC gene, which is mutated in adenomatous polyposis of the colon. Mutations in this gene are a cause of colorectal cancer (CRC), pilomatixoma (PTR), medulloblastoma (MDB), and ovarian cancer. Alternative splicing results in multiple transcript variants.

Recommended Dilutions

WB 1:500 - 1:2000

Immunogen Information

Gene ID

1499

Swiss Prot

P35222

Immunogen

A synthetic phosphorylated peptide around Y333 of human β -Catenin (NP_001895.1).

Synonyms

EVR7; CTNNB; MRD19; NEDSDV; armadillo; Phospho- β -Catenin-Y333

www.abclonal.com

Product Information

Source

Rabbit

Isotype

IgG

Purification

Affinity purification

Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS with 0.01% thimerosal, 50% glycerol, pH 7.3.
