AS035

Leader in Biomolecular Solutions for Life Science

# ABflo® 488-conjugated Donkey anti-Rabbit IgG (H+L)

Catalog No.: AS035 9 Publications

### **Basic Information**

**Observed MW** 

Calculated MW

Category Secondary Antibody

Applications IF/ICC,FC

**Cross-Reactivity** 

Conjugate ABflo® 488. Ex:491nm. Em:516nm.

### Background

Secondary antibodies are affinity-purified antibodies which will work with target-specific primary antibody in the detection, sorting or purification of its specified target. Secondary antibodies offer increased versatility enabling users to use many detection systems (e.g. HRP, AP, fluorescence). They can also provide greater sensitivity through signal amplification as multiple secondary antibodies . Most commonly, secondary antibodies are generated by immunizing the host animal (different from host species of primary antibody) with a pooled population of normal immunoglobulins from the host species of primary antibody and can be further purified and modified (i.e. antibody fragmentation, label conjugation, etc.) to ensure well-characterized specificity to corresponding normal immunoglobulins.

**Swiss Prot** 

### **Recommended Dilutions**

# Immunogen Information

IF/ICC	1:100 - 1:800
FC	1:100 - 1:800

# Gene ID Immunogen Rabbit IgG

**Isotype** ABflo<sup>™</sup> 488 conjugated IgG Purification Affinity purification

Storage

Source

Donkey

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.025% Sodium Azide,0.75% BSA,50% glycerol,pH7.3.

## Validation Data

Immunofluorescence analysis of HeLa cells, using PARP1 antibody (A0942) as the primary antibody at dilution of 1:100. The cells were incubated with the primary antibody overnight at 4°C. Secondary antibody: ABflo® 488conjugated Donkey Anti-Rabbit IgG (H+L) (AS035) at 1:100 dilution. Blue: DAPI for nuclear staining.

Flow cytometry:1X10^6 K-562 cells (negative control,left) and A-431 cells (right) were surface-stained with Purified Rabbit anti-Human E-Cadherin mAb(5 µl/Test,orange line) or secondary antibody only (blue line).Non-fluorescently stained K-562 and A-431 cells were used as blank control (red line). ABflo® 488-conjugated Donkey Anti-Rabbit IgG (H+L)(AS035, 1:800[] was used as a secondary antibody.
