Leader in Biomolecular Solutions for Life Science

[One Step] PSMC2 Antibody Kit

Catalog No.: RK05691

Basic Information

Applications

Cross-Reactivity

Human, Mouse, Rat

Observed MW

49kDa

Calculated MW

49kDa

Category

Antibody kit

Background

The 26S proteasome is a multicatalytic proteinase complex with a highly ordered structure composed of 2 complexes, a 20S core and a 19S regulator. The 20S core is composed of 4 rings of 28 non-identical subunits; 2 rings are composed of 7 alpha subunits and 2 rings are composed of 7 beta subunits. The 19S regulator is composed of a base, which contains 6 ATPase subunits and 2 non-ATPase subunits, and a lid, which contains up to 10 non-ATPase subunits. Proteasomes are distributed throughout eukaryotic cells at a high concentration and cleave peptides in an ATP/ubiquitin-dependent process in a non-lysosomal pathway. An essential function of a modified proteasome, the immunoproteasome, is the processing of class I MHC peptides. This gene encodes one of the ATPase subunits, a member of the triple-A family of ATPases which have a chaperone-like activity. This subunit has been shown to interact with several of the basal transcription factors so, in addition to participation in proteasome functions, this subunit may participate in the regulation of transcription. This subunit may also compete with PSMC3 for binding to the HIV tat protein to regulate the interaction between the viral protein and the transcription complex. Alternative splicing results in multiple transcript variants encoding distinct isoforms.

Product Information

Source

Rabbit

Purification

Storage

Avoid repeated freeze-thaw cycles.

Contact

www.abclonal.com

Component & Recommended Dilutions

Catalog No.	Product Name	Dilutions
RK05691-1	PSMC2 Rabbit pAb	49kDa
RK05691-2	HRP-conjugated Goat anti-Rabbit IgG (H+L)	49kDa

Immunogen Information

Gene ID5701

Swiss Prot
P35998

Immunogen

Recombinant fusion protein containing a sequence corresponding to amino acids 1-160 of human PSMC2 ($NP_002794.1$).

Synonyms

S7; MSS1; RPT1; Nbla10058; PSMC2
