Leader in Biomolecular Solutions for Life Science

# Recombinant Human MANF Protein

Catalog No.: RP00044

Recombinant

## Sequence Information

Species	Gene ID	Swiss Prot
Human	7873	P55145

### Tags

C-His

### Synonyms

MANF;ARMET;ARP

## Product Information

Source	Purification
<I>E. coli</I>	> 92% by SDS-PAGE.

### Endotoxin

< 1.0 EU/μg of the protein by LAL method.

### Formulation

Lyophilized from a 0.22 μm filtered solution of 20mM PIPES, 500mM NaCl, pH 6.0. Contact us for customized product form or formulation.

### Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

## Background

The protein is localized in the endoplasmic reticulum (ER) and golgi, and is also secreted. Reducing this protein increases susceptibility to ER stress-induced death and results in cell proliferation. Activity of this protein is important in promoting the survival of dopaminergic neurons. The presence of polymorphisms in the N-terminal arginine-rich region, including a specific mutation that changes an ATG start codon to AGG, have been reported in a variety of solid tumors; however, these polymorphisms were later shown to exist in normal tissues and are thus no longer thought to be tumor-related.

## Basic Information

### Description

Recombinant Human MANF Protein is produced by <I>E. coli</I> expression system. The target protein is expressed with sequence (Leu25-Leu182) of human MANF (Accession #NP\_006001.4) fused with an initial Met at the N-terminus and a 6×His tag at the C-terminus.

### Bio-Activity

### Storage

Store the lyophilized protein at -20°C to -80 °C for long term. <br>After reconstitution, the protein solution is stable at -20 °C for 3 months, at 2-8 °C for up to 1 week. Avoid repeated freeze/thaw cycles.

## Validation Data

---

Recombinant Human MANF Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 19 kDa.
