Leader in Biomolecular Solutions for Life Science

Active Recombinant Human Latent TGF-beta 1(C33S) Protein

Catalog No.: RP00161 Recombinant 2 Publications

Sequence Information

Species Gene ID Swiss Prot Human 7040 P01137

Tags

N-His

Synonyms

TGFB1; CED; DPD1; LAP; TGFB; TGFbeta; transforming growth factor beta-1;TGF-beta

1;CED;DPD1;LAP;TGFB;TGFbeta;TGF-β

Product Information

Source

Purification

HEK293 cells > 95% by SDS-

PAGE.

Endotoxin

< 0.1 EU/ μg of the protein by LAL method.

Formulation

Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4.Contact us for customized product form or formulation.

Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile 4 mM HCl. Avoid votex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

Basic Information

Description

Active Recombinant Human Latent TGF-beta 1(C33S) Protein is produced by HEK293 expression system. The target protein is expressed with sequence (Leu30-Ser390(C33S)) of human TGF-beta 1 (Accession #NP_000651.3) fused with an 8×His tag at the N-terminus.

Bio-Activity

1.Measured by its ability to inhibit cell proliferation of TF-1 human erythroleukemic cells. The ED₅₀ for this effect is typically 0.5-2 ng/mL, corresponding to a specific activity of $5.0\times10<\text{sup}>5</\text{sup}>\sim2.0\times10<\text{sup}>6</\text{sup}>$ units/mg.|2.Measured by its binding ability in a functional ELISA. Immobilized recombinant human TGFB1 at 2 µg/mL (100 µL/well) can bind recombinant human TGFBR2 with a linear range of 1-5 ng/mL.|3.Measured by its ability to inhibit the IL-4(Catalog: RP01161)-dependent proliferation of HT-2 mouse T cells. The ED₅₀ for this effect is 9.75-39 ng/mL, corresponding to a specific activity of $2.6\times10<\text{sup}>4</\text{sup}>\sim1.0\times10<\text{sup}>5</\text{sup}> units/mg}.$

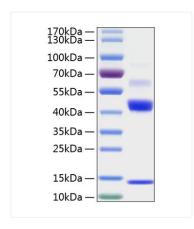

Storage

Store the lyophilized protein at -20°C to -80 °C for long term.

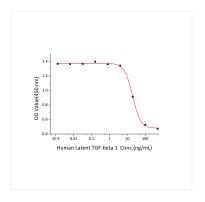

hr>After reconstitution, the protein solution is stable at -20 °C for 3 months, at 2-8 °C for up to 1 week.

Avoid repeated freeze/thaw cycles.

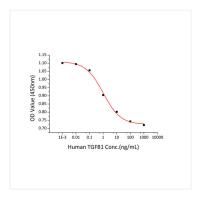

Validation Data

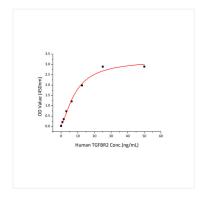

Active Recombinant Human TGF-beta 1(C33S) Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 13&42&60kDa.

Recombinant Human TGF-beta 1 inhibit the IL-4(Catalog: RP01161)-dependent proliferation of HT-2 mouse T cells. The ED $_{50}$ for this effect is 9.75-39 ng/mL, corresponding to a specific activity of $2.6\times10^4\sim1.0\times10^5$ units/mg.

Recombinant Human TGF-beta 1 inhibits cell proliferation of TF-1 human erythroleukemic cells. The ED $_{50}$ for this effect is typically 0.5-2 ng/mL, corresponding to a specific activity of $5.0\times10^5\sim2.0\times10^6$ units/mg.

Immobilized recombinant human TGFB1 at 2 μ g/mL (100 μ L/well) can bind recombinant human TGFBR2 with a linear range of 1-5 ng/mL.
