Leader in Biomolecular Solutions for Life Science

Recombinant Human CD27/TNFRSF7 Protein

Catalog No.: RP00326

Recombinant

Sequence Information

Species	Gene ID	Swiss Prot
Human	939	P26842

Tags

C-Fc & 6×His

Synonyms

CD27;S152;S152.
LPFS2;T14;TNFRSF7;Tp55;S152.LPFS2;
S152. LPFS2; T14; TNFRSF7; Tp55

Product Information

Source	Purification
HEK293 cells	> 95% by SDS-PAGE.

Endotoxin

< 1 EU/μg of the protein by LAL method.

Formulation

Lyophilized from a 0.2 μm filtered solution of 20 mM Tris, 150 mM NaCl, pH 8.0. Contact us for customized product form or formulation.

Reconstitution

Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water.

Background

This protein is a member of the TNF-receptor superfamily. This receptor is required for generation and long-term maintenance of T cell immunity. It binds to ligand CD70, and plays a key role in regulating B-cell activation and immunoglobulin synthesis. This receptor transduces signals that lead to the activation of NF-kappaB and MAPK8/JNK. Adaptor proteins TRAF2 and TRAF5 have been shown to mediate the signaling process of this receptor. CD27-binding protein (SIVA), a proapoptotic protein, can bind to this receptor and is thought to play an important role in the apoptosis induced by this receptor.

Basic Information

Description

Recombinant Human CD27/TNFRSF7 Protein is produced by Human Cell expression system. The target protein is expressed with sequence (Thr21-Ile192) of human CD27/TNFRSF7 (Accession #P26842) fused with an Fc, 6×His tag at the C-terminus.

Bio-Activity

Storage

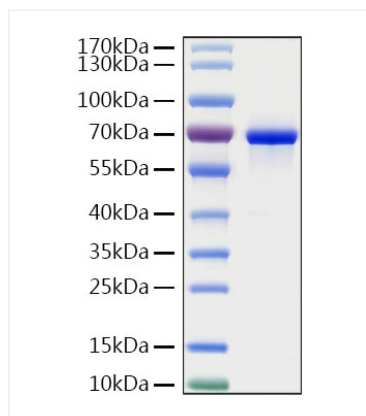

Store the lyophilized protein at -20°C to -80 °C for long term. After reconstitution, the protein solution is stable at -20 °C for 3 months, at 2-8 °C for up to 1 week. Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant protein Human CD27/TNFRSF7 was determined by SDS-PAGE under reducing conditions with Coomassie Blue, showing a band at 66 kDa.
