## Product Information

## Source Purification <br> HEK293 cells > 87\% by SDSPAGE.

## Endotoxin

$<0.1 \mathrm{EU} / \mu \mathrm{g}$ of the protein by LAL method.

## Formulation

Lyophilized from a $0.22 \mu \mathrm{~m}$ filtered solution of PBS, pH 7.4.Contact us for customized product form or formulation.

## Reconstitution

Centrifuge the vial before opening
Reconstitute to a concentration of $0.1-0.5 \mathrm{mg} / \mathrm{mL}$ in sterile distilled water. Avoid votex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1\% BSA, 5\% HSA, 10\% FBS or 5\% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

## Background

## Basic Information

## Description

Recombinant Mouse Dkk-1 Protein is produced by HEK293 expression system. The target protein is expressed with sequence (Met1-His272) of mouse Dkk-1 (Accession \#NP_034181.2. ) fused with a $6 \times$ His tag at the C-terminus

## Bio-Activity

Measured by its binding ability in a functional ELISA.Immobilized Mouse DKK-1 at 5 $\mu \mathrm{g} / \mathrm{mL}(100 \mu \mathrm{~L} /$ well $)$ can bind Human LRP-5 with a linear range of 1-399 ng/mL.

## Storage

Store the lyophilized protein at $-20^{\circ} \mathrm{C}$ to $-80^{\circ} \mathrm{C}$ for long term. <br>After reconstitution, the protein solution is stable at $-20^{\circ} \mathrm{C}$ for 3 months, at $2-8^{\circ} \mathrm{C}$ for up to 1 week. Avoid repeated freeze/thaw cycles.

Recombinant Mouse Dkk-1 Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at $38-45 \mathrm{kDa}$.

Immobilized Mouse DKK-1 at $5 \mu \mathrm{~g} / \mathrm{mL}$ (100 $\mu \mathrm{L} /$ well) can bind Human LRP-5 with a linear range of $1-399 \mathrm{ng} / \mathrm{mL}$.
