Leader in Biomolecular Solutions for Life Science

Recombinant Human Beta-NGF Protein

Catalog No.: RP01107

Recombinant

Sequence Information

Species	Gene ID	Swiss Prot
Human	4803	P01138

Tags

No tag

Synonyms

NGF; Beta-NGF; HSAN5; NGFB; nerve growth factor;Beta-NGF;HSAN5;NGFB

Product Information

Source	Purification
HEK293 cells	> 95% by SDS-PAGE.

Endotoxin

< 1.0 EU/μg of the protein by LAL method.

Formulation

Lyophilized from a 0.22 μm filtered solution of 20mM PB, 250mM NaCl, pH 7.0. Contact us for customized product form or formulation.

Reconstitution

Centrifuge the tube before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize freeze-thaw cycles.

Background

This protein is a secreted protein which homodimerizes and is incorporated into a larger complex. This protein has nerve growth stimulating activity and the complex is involved in the regulation of growth and the differentiation of sympathetic and certain sensory neurons. Mutations in this gene have been associated with hereditary sensory and autonomic neuropathy, type 5 (HSAN5), and dysregulation of this gene's expression is associated with allergic rhinitis.

Basic Information

Description

Recombinant Human Beta-NGF Protein is produced by Mammalian expression system. The target protein is expressed with sequence (Ser122-Arg239) of human β-NGF (Accession #P01138) fused with no tags.

Bio-Activity

Storage

Store the lyophilized protein at -20°C to -80 °C for long term. After reconstitution, the protein solution is stable at -20 °C for 3 months, at 2-8 °C for up to 1 week. Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Human Beta-NGF Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 15 kDa.
