RP01277

Leader in Biomolecular Solutions for Life Science

Active Recombinant Human ACE-2 Protein

Catalog No.: RP01277 Recombinant

Sequence Information

Background

Species Human Gene ID Swiss Prot 59272 09BYF1

Tags

N-His

Synonyms

ACE2; ACEH; angiotensin-converting enzyme 2;ACEH

Product Information

Source HEK293 cells

> 95% by SDS-PAGE.

Purification

Endotoxin

< 0.1 EU/ μ g of the protein by LAL method.

Formulation

Lyophilized from a 0.22 μ m filtered solution of PBS, pH 7.4.Contact us for customized product form or formulation.

Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid votex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Basic Information

Description

Active Recombinant Human ACE-2 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Gln18-Ser740) of human ACE2 (Accession #Q9BYF1) fused with a 6×His tag at the N-terminus.

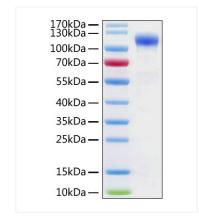

Bio-Activity

Measured by its binding ability in a functional ELISA. Immobilized recombinant Human ACE2 at 2 μ g/mL (100 μ L/well) can bind recombinant SARS-COV-2 S1 Protein with a linear range of 0.49-9.31 ng/mL.

Storage

Store the lyophilized protein at -20°C to -80°C for long term.
br/>After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

Immobilized recombinant Human ACE2-His at 2µg/mL (100 µL/well) can bind recombinant SARS-COV-2 S1-mFc Protein with a linear range of 0.49-9.31 ng/mL.

Active Recombinant Human ACE-2 Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 110-120 kDa.
