Leader in Biomolecular Solutions for Life Science

Recombinant Human GFRAL Protein

Catalog No.: RP02211

Recombinant

Sequence Information

Species	Gene ID	Swiss Prot
Human	389400	Q6UXV0

Tags

C-His&Avi

Synonyms

GFR alpha-like; GFRAL; GRAL; C6orf144

Product Information

Source

HEK293 cells

Purification

> 95% as determined by Tris-Bis PAGE. > 95% as determined by HPLC.

Endotoxin

< 1EU per µg by the LAL method.

Formulation

Lyophilized from 0.22µm filtered solution in 20mM PB, 300mM NaCl (pH 6.5). Normally 5 % trehalose is added as protectant before lyophilization.

Reconstitution

Centrifuge the tube before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

GFR alpha-like (GDNF receptor-alpha-like) is a distant member of the GDNFR family of proteins. Mature human GFR alpha-like is a 376 amino acid (aa) type I transmembrane protein. It contains a 333 aa extracellular domain, a 20 aa transmembrane domain and a 23 aa cytoplasmic domain. GFRAL is a brainstem-restricted receptor for GDF15 which regulates food intake, energy expenditure and body weight in response to metabolic and toxin-induced stresses

Basic Information

Description

Recombinant Human GFRAL Protein is produced by mammalian expression system. The target protein is expressed with sequence (Ser19-Glu351) of human GFRAL (Accession #) fused with a His and Avi Tag at the C-terminal. .

Bio-Activity

Storage

Store the lyophilized protein at -20°C to -80°C for long term. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

Validation Data

Human GFRAL on Tris-Bis PAGE under reduced condition. The purity is greater than 95%.

The purity of Human GFRAL is greater than 95% as determined by SEC-HPLC.

Immobilized Human GFRAL, His Tag at 0.5 μg/ml (100 μl/Well). Dose response curve for Human GDF15, hFc Tag with the EC_{50} of 9.4 ng/ml determined by ELISA.
