

RP02515

Leader in Biomolecular Solutions for Life Science

Recombinant Human CSF-3/G-CSF/Pluripoietin Protein

Catalog No.: RP02515

Recombinant

Sequence Information

Species	Gene ID	Swiss Prot
Human	1440	P09919

Tags

C-His

Synonyms

CSF3;C17orf33;CSF3OS;GCSF

Product Information

Source

<I>E. coli</I>

Purification

> 98% by SDS-PAGE.

Endotoxin

<0.1EU/μg

Formulation

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4.

Reconstitution

Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water.

Background

G-CSF is a hematopoietic growth factor. It can activate the progress that committed progenitor cells develop to neutrophils and enhance the functional activities of the mature end-cell. It is secreted in response to specific stimulation by a variety of cells, including bone marrow stroma, macrophages, endothelial cells and fibroblasts. In clinical treatment, G-CSF is used to facilitate hematopoietic recovery after bone marrow transplantation.

Basic Information

Description

Recombinant Human G-CSF Protein is produced by Escherichia coli expression system. The target protein is expressed with sequence of Human G-CSF fused with polyhistidine tag at the N-terminus

Bio-Activity

Measured by its ability to inhibit proliferation in NFS-60 cells. The ED₅₀ for this effect is <50 pg/mL. The specific activity of recombinant human G-CSF is > 2 x 10⁷ IU/mg.

Storage

Store the lyophilized protein at -20°C to -80°C for long term. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Human CSF-3/G-CSF/Pluripoietin Protein was determined by SDS-PAGE with Coomassie Blue, showing bands at 20 kDa.
