# Recombinant Mouses LAMP5 Protein

Catalog No.: RP02615

Recombinant

## Sequence Information

Species	Gene ID	Swiss Prot
Mouse		Q9D387

**Tags**  
C-hFc

### Synonyms

BAD-LAMP; LAMP-5; BADLAMP;  
C20orf103; dJ1119D9.3; UNC-43

## Product Information

Source	Purification
HEK293 cells	> 95% as determined by Tris-Bis PAGE > 95% as determined by HPLC

### Endotoxin

Less than 1EU per µg by the LAL method.

### Formulation

#### Reconstitution

Centrifuge the tube before opening.  
Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water.  
Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

## Background

Lysosome-associated membrane protein 5 (LAMP5) is a mammalian ortholog of the *Caenorhabditis elegans* protein, UNC-46, which functions as a sorting factor to localize the vesicular GABA transporter UNC-47 to synaptic vesicles. LAMP5 deficiency led to a larger intensity-dependent increase of wave I, II and V peak amplitude of auditory brainstem response. LAMP5 plays a pivotal role in sensorimotor processing in the brainstem and spinal cord.

## Basic Information

### Description

Recombinant Mouses LAMP5 Protein is expressed from Expi293 with hFc tag at the C-terminal. It contains Glu30-Glu235.

### Bio-Activity

### Storage

Store the lyophilized protein at -20°C to -80°C for long term. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

## Validation Data

Mouses LAMP5 on Tris-Bis PAGE under reduced condition. The purity is greater than 95%.

The purity of Mouses LAMP5 is greater than 95% as determined by SEC-HPLC.
