Leader in Biomolecular Solutions for Life Science

Recombinant Mouse Serum albumin/ALB Protein

Catalog No.: RP02805

Recombinant

Sequence Information

Species	Gene ID	Swiss Prot
Mouse	11657	P07724

Tags

C-His

Synonyms

ALB;HSA;PRO0883;PRO0903;PRO1341;albumin;Albumin ;Alb

Product Information

Source	Purification
HEK293 cells	> 95% as determined by HPLC

Endotoxin

<1EU/μg

Formulation

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4.

Reconstitution

Centrifuge the tube before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize freeze-thaw cycles.

Background

Albumins are multifunctional proteins present in the blood serum of animals. They can bind and transport a wide variety of ligands which they accommodate due to their conformational flexibility. Serum albumins are highly conserved both in amino acid sequence and three-dimensional structure. Several mammalian and avian serum albumins (SAs) are also allergens. Sensitization to one of the SAs coupled with the high degree of conservation between SAs may result in cross-reactive antibodies in allergic individuals.

Basic Information

Description

Recombinant Mouse Serum albumin/ALB Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Glu25-Ala608) of mouse Serum albumin/ALB (Accession #NP_033784.2) fused with a 6xHis tag at the C-terminus.

Bio-Activity

Mouse Serum Albumin, His Tag immobilized on CM5 Chip can bind Mouse FcRn, His Tag with an affinity constant of 54.53 nM as determined in SPR assay (Biacore T200).

Storage

Store the lyophilized protein at -20°C to -80°C for 12 months. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Mouse Serum albumin/ALB Protein was determined by SDS-PAGE with Coomassie Blue, showing bands at 65 kDa.

The purity of Mouse Serum albumin/ALB is greater than 95% as determined by SEC-HPLC.

Mouse Serum Albumin, His Tag immobilized on CM5 Chip can bind Mouse FcRn, His Tag with an affinity constant of 54.53 nM as determined in SPR assay (Biacore T200).
